

Afforestation Management Plan

Forest/Block Name: Glen Islay

Plan details.

Plan Date: 10/04/2025
Planned start date: 19/05/2025
Planned end date: 31/10/2025
Plan prepared by: Mark Byrnes
Contact Person (Operational): Eddie Collins – 021 220 1013

Property details

Land Owner: Roy Trustee 2022 Limited
Forest Owner (If different):
Block General Location: Mandeville
Block location Address: 591 Waimea Valley Road, Mandeville
Legal Description: Lot 1 DP 321, Lot 1 DP 335, Sec 173 Hokonui SD, Sec 294 Hokonui SD, Sec 295 Hokonui SD, Sec 298 Hokonui SD, Sec 424 Hokonui SD, Sec 437 Hokonui SD, Sec 438 Hokonui SD, Sec 543 Hokonui SD, Sec 166 Blk LVI Hokonui SD, Lot 2 DP 335, Sec 105 Hokonui SD
Property OT: SL-6A/763, SL-7B/476, SL-7C/669, SL-9D/208, SL-A2/1283

Block Location

Regional Council: Environment Southland
District Council: Southland District Council
Access Road/Nearest Road: Waimea Valley Road

Consultant/Principal Contractor

Consultant Company Name: Venture Forestry Limited
Consultant individual name:
Phone Number:
Postal Address: 176 Puddle Alley Road, Mosgiel 9011
Email Address: admin@ventureforestry.co.nz

Activity

Afforestation to be undertaken manually using people and spades. Planting will be continuous contoured lines wherever possible. A mechanical planter may be used on some of the lower rolling country.

Block/s sizes (as per supplied map)

Species: [Pinus Radiata](#)

Area(ha): [3201](#)

Map Contents

Computer freehold register, date, north arrow:	Yes
Property boundaries within 200m:	Yes
Afforestation/Replanting area boundary	Yes
Species to be afforested or replanted:	Yes
Year Afforestation/Replanting is to occur	Yes
Contour lines at less than or equal to 20m intervals:	Yes
Erosion susceptibility classification (map overlay):	Yes
Location of significant natural areas and vegetation clearance:	NA
Features to be protected during operation (Archaeological areas etc):	Yes
Any water body or the coastal marine area, including—	Yes
(i) wetlands larger than 0.25 ha and lakes larger than 0.25 ha; and	
(ii) rivers to their perennial extent; and	
(iii) rivers where the bankfull channel width is 3 m or more; and	
(iv) any outstanding freshwater body	
or water body subject to a water conservation order; and	
(v) any setbacks from any identified water body or the coastal marine area:	
Registered drinking water supply and any drinking water sources for more than 25 people within 1 km downstream of the commercial forestry activity:	NA
Existing roads, tracks, river crossings:	Yes

Significant Natural Areas (SNA):

SNA's present within or adjacent to the Afforestation/~~Replanting~~ area/s? [NA](#)
If yes describe,

Is there any Indigenous vegetation present? [Yes](#)
If yes describe,

- How SNA/indigenous vegetation going to be protected? (include description of setbacks etc.)
 - [Some small areas of indigenous vegetation present. These will have a 5m setback](#)
 - [Arch site F45/4, this is the site where a lone artefact was found. An initial 50m setback from the site subject to ongoing discussions with Arch NZ and Heritage Properties LTD](#)

- Operational restrictions, including restrictions on afforestation or replanting, earthworks operations, or harvesting, as applicable, that will be used to ensure that no commercial forestry activity occurs within the significant natural area.
 - As above

WATER QUALITY & SEDIMENT

River present in Afforestation/replanting Area?	Yes
Bank Full Width?	Less than 3m
Description of waterway/wetland (tributary of?): Dornoch Burn & Otamita Stream run through and/or along the bottom edge of the notifiable afforestation areas	
Wetland present in block?	No
If yes, describe (size & nature):	
Fish spawning indicated in block during the Planting/replanting:	Yes
If yes, Indicated spawning species:	
Fish spawning indicated in block during the Planting/replanting:	Yes
If yes, Indicated spawning species: Trout	
Spawning date range: 15 May to 15 September	
Indigenous species of funa:	
Are threatened or at-risk species of indigenous fauna present?	No
If yes, describe how these areas will be protected:	
How has the land been prepared for afforestation/replanting?	
Vegetation Burnt:	NA
Mechanical land preparation:	Yes
Intensive grazing:	Yes
Sprayed:	Yes
Other (describe):	NA

Risk of sediment and or slash being mobilized (site specific):

Mechanical land preparations has been undertaken by the landowner prior to VFL starting the afforestation. There have been setbacks or bunding left wherever required to limit any mobilization to waterways.

Proposed heavy rainfall contingency and response:

After the afforestation occurs, Venture Forestry will carry out 2 other site visits. This is for release spraying and survival surveys. Other than the two visits outlined above, the land owner is responsible for the site. If requested by the landowner Venture Forestry will carry out further site visits.

Specific triggers or thresholds for action:

If alerted by landowner, or an issue observed when on site as described above.

Description including maintenance, post work monitoring and corrective actions:

With this being afforestation, it is not expected that any maintenance or corrective measures will be required. If there are areas that require maintenance or corrective actions, this will be done as soon as practical after discovering, or being alerted to, the potential risk.

Description of monitoring erosion and sediment effects of afforestation/~~replanting~~:

A minimum of two visits will be carried out post planting, these being for release spraying and for a survival survey. If there are any issues, or potential issues, then these will be addressed as soon as practical after observing or being made aware. Any areas observed to be high risk at the time of afforestation will receive additional visits during and/or after rain events.

Set Backs

5m minimum setbacks from all perennial waterways and wetlands, these include areas with aquatic vegetation that do not show on maps supplied to contractors

10m setbacks from legal property boundaries, except where adjacent to forested area.

50m setbacks from Arch site (TBC)

NES CF setbacks have been calculated by Venture staff on site and using aerial imagery. Setback will be managed on site during replanting by the silviculture contractor, these will also be audited by Venture Forestry staff carrying out quality control checks.

Wilding Trees

Wilding risk calculator score and calculation sheet provided to council? Yes

Description of how wilding risk was calculated:

Wilding risk assessments were made with observations made during 2023 afforestation, and during planning site over 2023 - 24.

There has also been consultation with the landowner regarding predominant wind direction and grazing in and around these areas.

Description of:

- Any adjacent properties under the same ownership.
 - Refer to supplied map.

- Schedule for undertaking wilding inspections.

A minimum of two visits will be carried out post planting, these being for release spraying and for a survival survey. If there are wilding trees

observed at these visits they will be addressed as soon as practical after observing or being made aware of by the owner.

- How wildings will be removed.
If wilding trees are required to be removed, this will be carried out by hand pulling, or cutting off and ground level and applying poison directly to the stumps.

Indigenous Birds

Procedures for Indigenous birds nesting in block:

Crew to stop work and alert Venture Forestry upon discovery of any indigenous birds nesting within block. Consultation with Parker Conservation as to the best course of action to cause least disturbance to the nesting birds. Harvest in the effected are will not continue until cleared by Parker Conservation or a suitably qualified person deems it no risk to do so.

Nesting is unlikely during the planting season as it is in the winter months.

No indigenous birds sighted at site visits prior to operation.

Note:

The owner is in the process of potentially subdividing/selling parts of this planned afforestation area.

The information on area submitted was as accurate as possible at the time of submitting this management plan.

If there are any significant changes a plan amendment will be carried out and submitted to councils. This is likely to only be a reduction in area size that is planting.

Plan Amendment

Plan Amendment made: NA

Date plan amended: Enter

Plan amended by:
