

Field Measurement Approach Participant-specific Tables

ETSFMAPST.01

Participant

Participant Name:	Jelldale Limited
Submitter Name:	Allan Cecil Laurie
Holding Account Number:	NZ-8779
Scheme Type:	ETS
Application Reference:	ETSFMAIAP-057573

Report Summary

Tables Generated:	1 June 2023 10:07 AM
Plot Set Allocation Date:	18 October 2022
FMA Information Submission Date:	24 March 2023

Participant-specific Tables

Attached are your participant-specific tables for the following forest types:

- Pinus radiata

For each forest type there are two tables:

- Carbon stock per hectare
- Carbon stock per hectare in above-ground residual wood and below-ground roots from clearing.

The use of the tables is in accordance with Climate Change (Forestry Sector) Amendment Regulations 2011 Section 22E.

Note: An additional declaration must be made when submitting a mandatory emissions return using participant-specific tables that the silviculture and adverse event information provided, at the time the tables being used were generated, remains valid.

Tables of Carbon Stock per Hectare for Post-1989 Forest Land

Pinus radiata

Carbon stock per hectare for Pinus radiata (expressed as tonnes of carbon dioxide per hectare).
