OTUREI LEASE BLOCK

Congratulations on your achievement

What does your achievement mean?

Te Tihi

The peak

Te Tihi is our highest level of achievement. Te Tihi recognises those farmers in the Co-op who are leading the way in producing high quality and sustainable milk.

- To achieve Te Tihi, your farm must have met Te Pūtake, and then achieved milk quality excellence for at least 90% of the season.

Te Puku

The centre

Te Puku is determined by a farm's ability to provide the best quality milk possible. To achieve Te Puku, your farm must have first met Te Pūtake and then achieved one or both of these:

- **Milk Quality Excellence:** Your farm will qualify for financial recognition for every day of high quality milk supply during the season.
- **Emissions Excellence:** Your farm will achieve financial recognition for producing low emissions milk from your farming activities (like your feed, fertiliser and herd).

Te Pūtake

The start

Achieving Te Pūtake – the starting point for the Co-operative Difference – means you've completed seven key achievements that demonstrate valued on-farm practices.

- Your farm will qualify for financial recognition for all milk supplied during the season.
- Farms that achieve Te Pūtake unlock access to Te Puku, Te Tihi and Customer Incentives*.

*Additional criteria applies

We've begun a review of the Co-operative Difference for 2027/28 to ensure the programme still supports and rewards farmers in adopting practices that set Fonterra up for success with key customers and markets. And we have a big focus on saving you time where we can.

In the meantime, we have adjusted the programme for the 2026/27 season to remove duplication. We have removed 5 of the 7 requirements needed to achieve Te Pūtake (the start), which is the first step of the Co-operative Difference.
