INTRODUCTION

New Zealand Biosecurity Services Ltd has been engaged by Auckland Council to complete an inspection and advise against the following consent conditions:

Condition 4:

a. Stock proof fence
b. Inspection of fence
c. Weed & pest control
d. Riparian plantings
e. Landscape plan

Ray was met on site to discuss how the conditions had been met.

Covenant areas were assessed one at time with the applicable conditions evaluated for each area.

INSPECTION RESULTS

4a) Stock proof fence

A permanent ungated continuous stock-proof fence has NOT been around the perimeter of the covenant area. Multiple gates were present in the fence line these will need to be removed and fenced over for this condition to be met. Sections of fence in areas have been undercut by water courses and will also need to be refenced in order to make these areas stockproof (figures 1 – 2).

4b) Inspection of Fence

The fencing has been inspected to NOT be in accordance with the condition requirements as per condition 4a) above.

4c) Weed and pest control

Pest plant control has NOT been carried out in accordance with the approved weed and pest plan prepared by Cato Bolam Consultants. The following pest plants were observed to be present within the covenant area and will require control to meet this condition:
Woolly nightshade (Solanum mauritianum), foxglove (*Digitalis sp.*), elephant ear (*Colocasia*), arum lily (*Zantedeschia aethiopica*), poplar (Populus sp.), eucalyptus (*Eucalyptus saligna*) and pampas (Cortaderia selloana).

Pest animal control has NOT been implemented in accordance with the approved Weed and Pest plan. More Philproof bait stations and DoC 200 traps are required for the condition to be met.

4d) Riparian plantings

Planting has been carried out in accordance with the approved plan prepared by Coast Gardening, dated August 2019 and Cato Bolam June 2018. Planting was carried in planting season of 2019 and largely consists of manuka (*Leptospermum scoparium*), harakeke (*Phormium tenax*) and karamu (*Coprosma robusta*). Plants appear healthy and are at the proper spacings.

4e) Landscape plan

A landscape plan has been prepared and submitted to Auckland Council by Coast Gardening on the August 2019 and Cato Bolam June 2018. The planting has been implemented in general accordance with the landscaping plans provided.

PHOTOGRAPHIC EVIDENCE SUPPLIED DURING AUDIT

Figure 1. Seven-wire post and batten fence protecting covenant area.

Figure 2. Seven-wire post and batten fence protecting covenant area.

Figure 3. Seven-wire post and batten fence protecting covenant area.

Figure 4. Demarcation posts to identify covenant area.

Figure 6. Gate to be removed and covered by appropriate fence to meet condition of a continuous stock proof fence around covenant.

Figure 7. Fence where maintenance is required to fill spacing between seasonal waterway and bottom of the seven-wire fence to prevent stock access to covenant area.

Figure 8. Poplar in covenant area that has been previously controlled by felling and stump painting.
