---

Hi Lexie,

Thank you for your email in relation to this application.

I have reviewed the material provided and I consider that in this particular case (due to the specific circumstances around this proposal and the location of Lot 3 as shown in Figure 1 below) the proposed Lot 3 can be established as per the lodged scheme plan (i.e. entirely within the LUC 3 / HPL area). The proposal is not contrary to the NPS-HPL and reasons for this are:

- There is an existing resource consent that (if enacted) would result in Lot 3 being located on HPL. Around half (1ha or so) of this lifestyle lot (Lot 3) would be on HPL and therefore consume this land (i.e. taking it out of primary production and turning it over to rural-residential uses). The new proposal would mean that Lot 3 would consume less HPL (0.77ha).
- The new proposed Lot 3 site already has a building consent granted on it and construction of the building is underway (the building consent was granted for the building site on the larger balance lot). Therefore, the shifting of Lot 3 to coincide with this building has the potential to lessen the number of other potential new building platforms that could locate on HPL on the balance site.
- The building consent (and construction of the dwelling) has already compromised some of the new Lot 3 land for primary production uses (i.e. land taken out of potential primary production uses by the building platform, accessway, and curtilage area for accessory buildings/gardens/pools etc). This further reduces the area of HPL useable for primary production that the new Lot 3 will consume.

Figure 1: Existing consented area for Lot 3 (outlined in blue) and the proposed new Lot 3 locations (outlined in red).

Feel free to contact me should you have any further queries.

Subject: Report for review- SUB60315119-A- Remiger Road
Importance: High

Good morning Dave and Ryan,

Hope you all had a lovely long weekend!

Is that possible for me to get your view on this before making a decision on this one?

- This one is a s127 which will change the location and size of the approved Lot 3. The key differences of Lot 3 are outlined below

	Consented	proposed
Lot size	2ha	0.77ha

Highly productive land	Part of the Lot contains HPL, being around 7000m2	Fully within HPL area

- The application was lodged in 2020 and NPS HPL became operative last year
- On the one hand, SUB over HPL to create rural lifestyle lot had already been approved and BC has been obtained to construct a dwelling within the proposed Lot 3 and it is currently under construction
- On the other hand, considering the location, size of the lot, it would further compromise the productivity of the land, increase the level of inconsistency with the NPS HPL

Could you please help me to have a look and let me know whether from a policy perspective, the proposed changes would be considered contrary to the NPS HPL provisions?

Thanks very much for your help and happy to discuss!

Hi Lexie & Ken,

Hope your weeks are going well.

Please find attached s127 report for review. This is a very old one (from 2020)- I've confirmed with Bonnie that the notification exclusion would still apply. The AC OneDrive link also doesn't work anymore, so the information is in the link below. Conditions are with Myles Goodwin for review.

Their deadline for getting s223 approval is coming up, so they're keen for a decision as soon as you're able.

Please let me know if you have any queries.

Kind regards.,

Hannah
