Executive Summary

NICKLIN FARMS

Rarely does an opportunity of this scale, setting and proximity to Auckland come to market. Held within the same family since the 1860s and offered for the first time in generations, 77 Remiger Road is approximately 299 hectares of well-located Puhoi hill country, reached by an easy drive north on State Highway 1.

The property has been farmed as a sheep and beef unit and carries the infrastructure to keep doing so – a woolshed, two sets of yards and a two-bedroom home. But perhaps the greatest attraction is what lies beyond the farm gate.

Imagine having almost 300 hectares as your own private playground: mountain biking, horse trekking, hunting, exploring, four-wheel driving, family adventures or just farming. Game animals frequent the property, with pigs and goats regularly sighted through the bush and gullies, putting the hunting on your doorstep rather than a weekend away. There is room here to create a lifestyle unlike anything else so close to Auckland.

A natural stream winds its way through the property, while areas of retired native forest provide a beautiful backdrop and a sense of seclusion. Hidden within the bush is a five-tier cascading waterfall, a genuinely rare feature that adds real character and sets the property apart. From elevated parts of the property, the landscape opens towards Great Barrier Island and the Coromandel on one side and stretches west on the other, creating an extraordinary setting for a future home.

Orewa Beach is approximately 20 minutes away, the iconic Puhoi Pub is only minutes away, and the Te Araroa Trail runs down Remiger Road itself.

Who this property suits

LIFESTYLER BUYER	A CHANCE TO CREATE A PRIVATE RURAL SANCTUARY WITHIN EASY REACH OF THE CITY.
FARMER	A SUBSTANTIAL HOLDING WITH ESTABLISHED DRYSTOCK INFRASTRUCTURE.
ADVENTURER	A PLAYGROUND ON A SCALE RARELY FOUND THIS CLOSE TO AUCKLAND.
FORESTRY AND CARBON INVESTOR	PREDOMINANTLY CLEAN PASTURE THAT WAS NON-FOREST IN 1989 WITH PLANTING OPTIONALITY, ALONGSIDE ESTABLISHED NATIVE BUSH.
DISCERNING BUYER	SOMETHING INCREASINGLY SCARCE: A SIGNIFICANT LANDHOLDING
DEVELOPER	POTENTIAL DEVELOPMENT OPPORTUNITIES

Key Features

Freehold Titled Area	Grazing Area
299.75ha	≈195ha

- 299.75ha of well-maintained sheep and beef country north of Auckland.
- Offered to the market for the first time since the 1860s.
- Approx. 195ha effective grazing area.
- Six titles across nine parcels, subject to an amalgamation covenant - see Property Overview.
- Approx. 185ha of grassland indicatively eligible for ETS afforestation, plus approx. 34ha of existing woody cover that may be registrable as post-1989 forest.
- Approx. 104ha of native bush, mānuka and kānuka, with retirement and wetland options.
- Views to both coastlines, including Great Barrier Island and the Coromandel.
- Good aspect to the north/north-east.
- Dual road access off Remiger and Tunnel Roads.
- Te Araroa Trail runs down Remiger Road, creating tourism and recreation appeal.
- Approx. 20 minutes to Orewa Beach; minutes to the Puhoi Pub and State Highway 1.
- Beautiful private tiered waterfall

FOR SALE - BY TENDER: 4PM, WEDNESDAY 4 NOVEMBER, 2026

(UNLESS SOLD PRIOR)

Any enquiries in relation to this sale to be directed to Warwick Searle, George Cashmore or James Burke of Searle Agri, including clarification or interpretation of any matters within this request for sale, and inspections are strictly by appointment only.

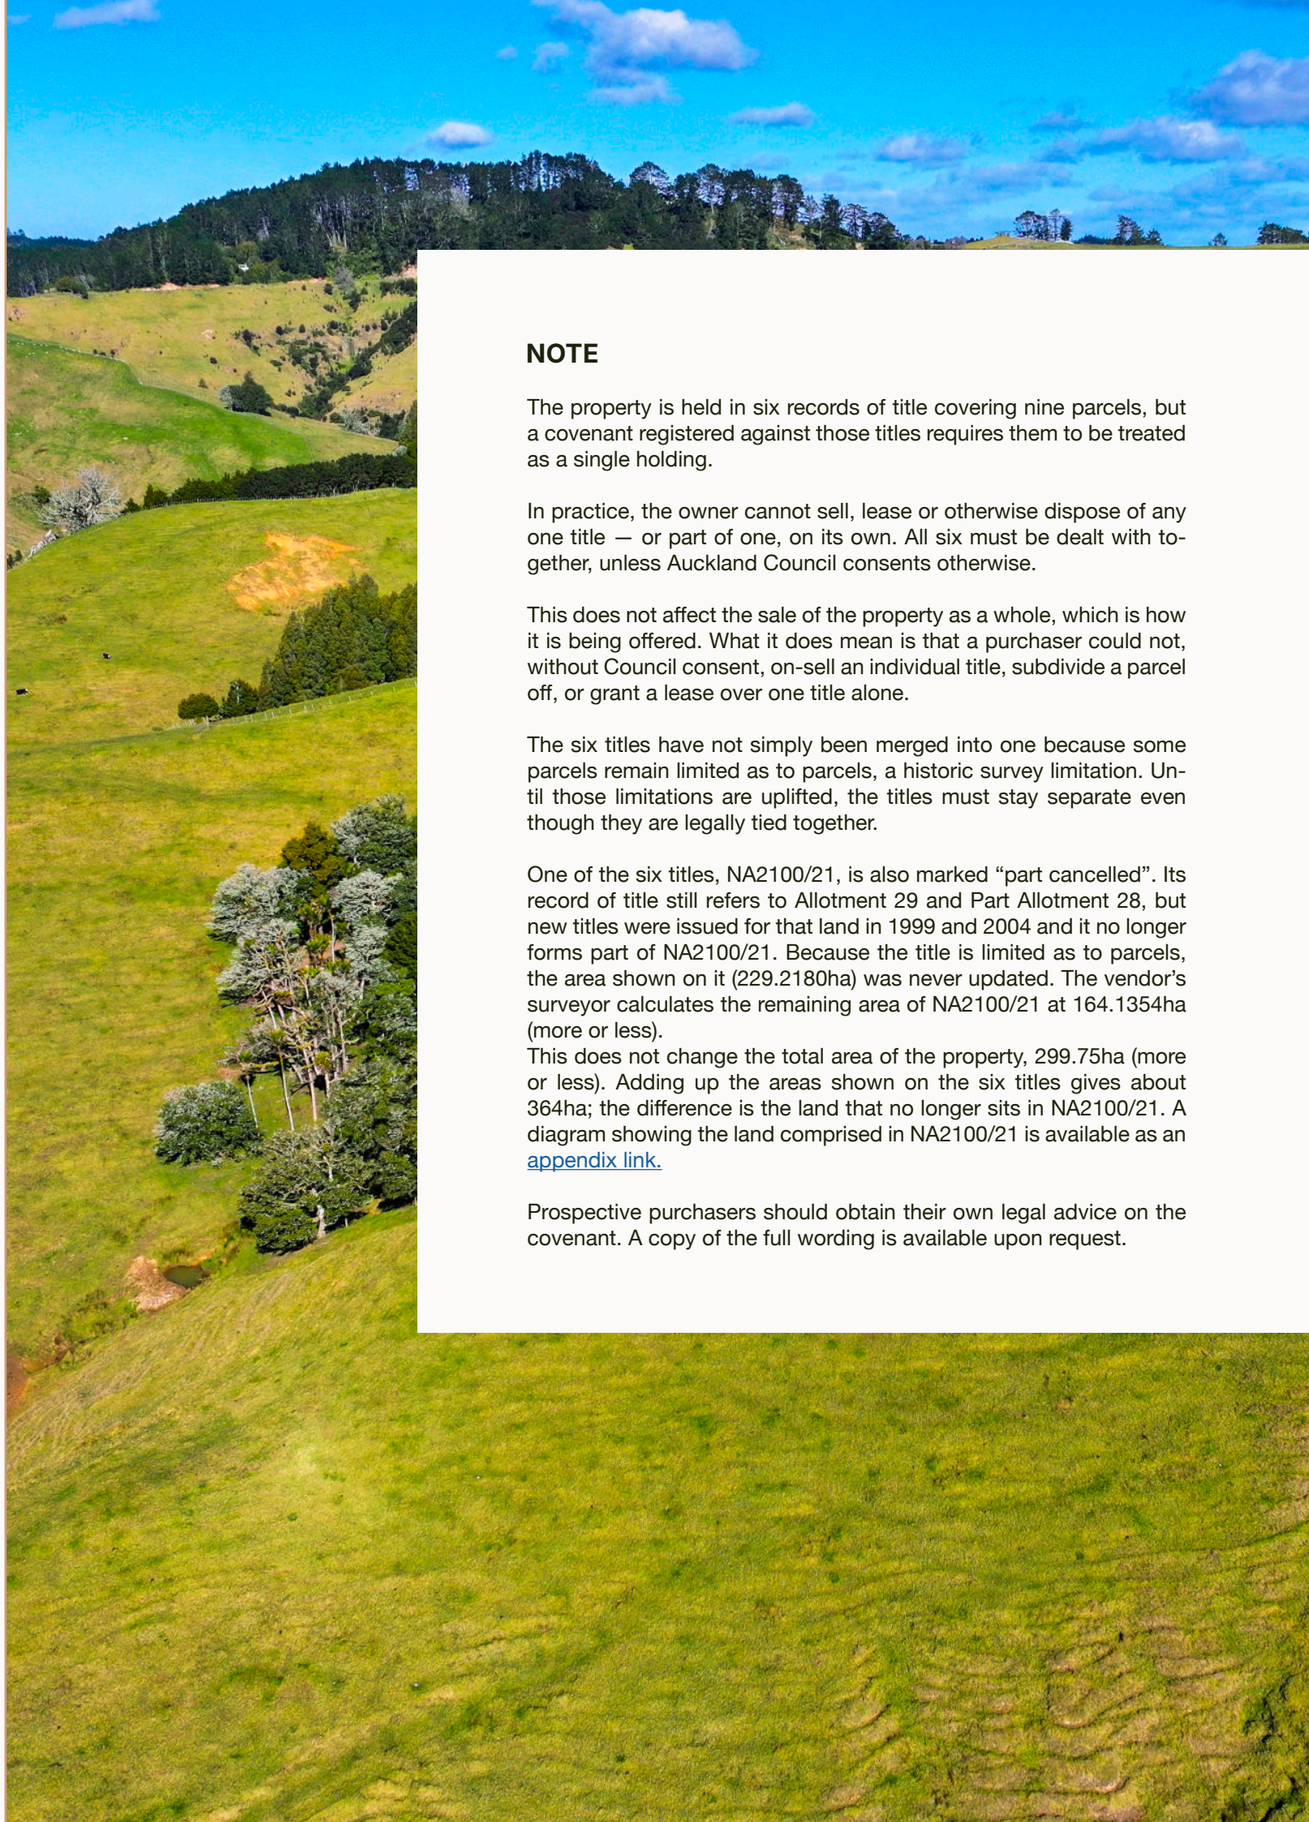

Property Details

ADDRESS	77 Remiger Road, Puhoi, Warkworth, Auckland
VENDOR	Raymond Charles Nicklin and Desma Elizabeth Nicklin
LAND DISTRICT	North Auckland
LAND AREA	299.75ha (more or less)
TENURE	Freehold
ZONING	Rural Production Zone
LOCAL BOARD	Territorial Authority: Auckland Council | Local Board: Rodney
AUCKLAND COUNCIL LAND USE	Stock finishing
RATES	$9,995.92 including GST
CAPITAL VALUE	CV: $4,745,000 | LV: $4,275,000 | IV: $470,000

TITLES

Six records of title across nine parcels - see schedule below

RECORD OF TITLE	LEGAL DESCRIPTION
1159734	Fee Simple, 1/1, Lot 6 Deposited Plan 598139
974873	Fee Simple, 1/1, Lot 9 Deposited Plan 541977
NA105B/748	Fee Simple, 1/1, Lot 1 Deposited Plan 179794
NA2100/21	Fee Simple, 1/1, Allotments 32 and 35 Parish of Puhoi and Part Allotments 30 and 31 Parish of Puhoi
NA31C/965	Fee Simple, 1/1, Allotment 54A Parish of Puhoi
NA757/204	Fee Simple, 1/1, Part Allotment 36 Parish of Puhoi

NOTE

The property is held in six records of title covering nine parcels, but a covenant registered against those titles requires them to be treated as a single holding.

In practice, the owner cannot sell, lease or otherwise dispose of any one title — or part of one, on its own. All six must be dealt with together, unless Auckland Council consents otherwise.

This does not affect the sale of the property as a whole, which is how it is being offered. What it does mean is that a purchaser could not, without Council consent, on-sell an individual title, subdivide a parcel off, or grant a lease over one title alone.

The six titles have not simply been merged into one because some parcels remain limited as to parcels, a historic survey limitation. Until those limitations are uplifted, the titles must stay separate even though they are legally tied together.

One of the six titles, NA2100/21, is also marked “part cancelled”. Its record of title still refers to Allotment 29 and Part Allotment 28, but new titles were issued for that land in 1999 and 2004 and it no longer forms part of NA2100/21. Because the title is limited as to parcels, the area shown on it (229.2180ha) was never updated. The vendor’s surveyor calculates the remaining area of NA2100/21 at 164.1354ha (more or less).
This does not change the total area of the property, 299.75ha (more or less). Adding up the areas shown on the six titles gives about 364ha; the difference is the land that no longer sits in NA2100/21. A diagram showing the land comprised in NA2100/21 is available as an appendix link.

Prospective purchasers should obtain their own legal advice on the covenant. A copy of the full wording is available upon request.

Farm Overview

WATER

A natural stream runs through the property, and there are a series of small dams fed by springs, which provide most stock water. Some troughs are fed by a tank positioned at the rear of the property. There is also bore water provided via easement to a tank at the front of the property. This supplies the house and could also be pumped around the farm for stock water.

ACCESS AND TRACKING

The property has dual road access off Remiger Road and Tunnel Road. The Te Araroa Trail also runs down Remiger Road providing possible tourism opportunities.

The farm is serviced by a good central race that provides access all the way to the rear of the farm. This provides efficient stock movement and access to most parts of the property.

FENCING AND SUBDIVISION

Fencing is predominantly eight-wire post-and-batten fencing. This has predominantly been well maintained and is in reasonable to good condition. There is an opportunity to increase subdivision through retirement and increase dry matter utilisation.

ANIMAL HANDLING AND FACILITIES

The woolshed is a four-stand shed in good usable condition. It has the ability to night pen undercover approximately 400-500 head of sheep. The shed is fed directly from the main set of yards near the front of the property.

There are two sets of yards. The first, near the front of the property, is of solid construction with a good load-out ramp and is used for both cattle and sheep.

The second set to the rear of the property is located on a paper road and is shared with a neighbour. They are in good condition and provide good service and efficiency for load outs, animal handling and health treatments without having to bring stock all the way to the front of the property.

Farm Information

FERTILISER HISTORY

The farm has been traditionally well fertilised over the family's long farming history. In recent years the property has been lightly stocked and fertiliser applications have been deemed unnecessary. There are no recent soil tests being undertaken or available.

LIVESTOCK & PRODUCTION

The property has been farmed as a sheep and beef breeding and finishing unit. The stock numbers provided below are from when the farm was run at its traditional capacity.

CLASS	NUMBER
SHEEP	1,500 head of MA Ewes
CATTLE	100 head of MA Beef cows
TOTAL STOCK UNITS	2100 SU

Dwellings & Improvements

HOMESTEAD

A comfortable two-bedroom home with a workshop underneath. There are also two large sheds providing storage and garaging.

FARM BUILDINGS

- WOOLSHED
- 1-BEDROOM CABIN IN BUSH BLOCK
- TWO SETS OF STOCK YARDS
- 3-BAY IMPLEMENT SHED
- 1-BEDROOM SLEEPOUT

Land Use Capability

Aspect

Native Bush & Carbon

COVENANTS

There are covenants registered on the titles affecting areas of native bush. It is understood these relate to protection and permanent fencing of bush areas, likely in connection with regional council support. Three points follow from this, and they are the commercial heart of the opportunity:

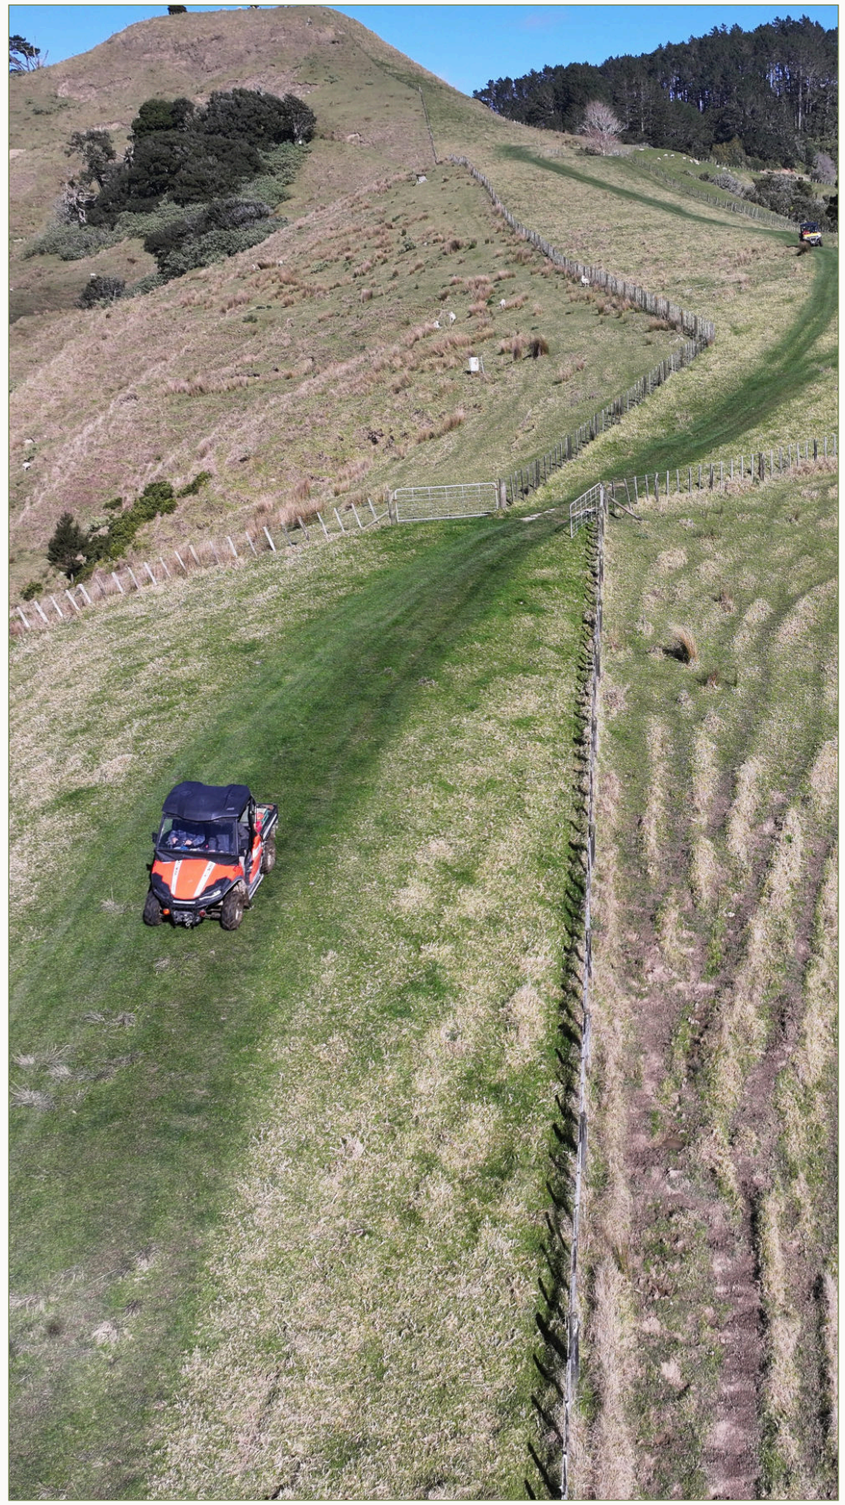

- Approximately 185 hectares of grassland sits on land classed as non-forest in 1989. Subject to MPI determination, this is the afforestation-eligible area — a purchaser could plant part or all of it and register the new forest in the ETS.
- Approximately 34 hectares of existing woody cover — 19.8 hectares of native bush and 14.1 hectares of shrub, mānuka and kānuka — also sits on non-forest-1989 land. Where this meets the forest land definition it may be registrable as post-1989 forest without any planting at all.
- Approximately 67 hectares of the established native bush is pre-1990 forest land and is not eligible for post-1989 registration. This is the older bush and is likely to overlap substantially with the covenanted areas.

OTHER ENVIRONMENTAL OPTIONALITY

- Native retirement and wetland establishment may enable the generation of Transferable Rural Site Subdivision (TRSS) rights.
- A blended farming, forestry and carbon model is realistic on this contour, particularly across the areas of medium hill to steep country.
- Mānuka and kānuka areas offer a potential honey or native regeneration angle alongside carbon.

Alternative Land Uses

77 Remiger Road has been farmed as a sheep and beef unit for generations, but its contour, cover, access and proximity to Auckland open up a range of uses beyond conventional drystock farming. The options below are not mutually exclusive — the most realistic outcome for many purchasers will be a blend, with the flats and easier hill retained for grazing or a homestead setting and the steeper country put to work in other ways.

FORESTRY FOR CARBON AND PRODUCTION

Approximately 185 hectares of grassland sits on land classed as non-forest in 1989 and is indicatively eligible for ETS afforestation, with a further 34 hectares of existing woody cover that may be registrable without any planting at all. The 255 hectares of LUC Class 6 and 31 hectares of Class 7 country represent the natural planting envelope. With 1,400–1,500 mm of reliable annual rainfall, a mild coastal climate and a predominantly north to north-east aspect, growth rates on this contour would be expected to be strong.

A purchaser could pursue a production radiata regime for both carbon and log revenue, a permanent exotic or native regime under the ETS permanent category, or a mix of the two across different faces. Northport and Port of Auckland, alongside a number of timber processors, are within an economical distance of the property, supporting a production forest, while the carbon case benefits from the property's scale within an hour of the city. The mānuka and kānuka areas add a native regeneration and honey angle.

HORSE TREKKING AND TRAIL-BASED RECREATION

The Te Araroa Trail runs down Remiger Road itself, placing the property directly on a nationally recognised walking route. Dual road access off Remiger Road and Tunnel Road, a well-formed central race to the rear of the farm and existing stock tracks across the hill country provide a ready-made trail network for horse trekking, guided walking or mountain biking. The elevated ridgelines with views to both coastlines are an obvious drawcard, and the sleepout and bush cabin offer a starting point for overnight or multi-day product. Orewa, Puhoi and the Warkworth motorway put the property within easy reach of Auckland's day-trip and weekend market.

HUNTING, SAFARI AND GAME ESTATE

Approximately 104 hectares of native bush, mānuka and kānuka, a natural stream and steep gully systems give the property genuine wild character, and the scale of the holding allows a hunting or game-estate operation to be run at a distance from the homestead and neighbours. Game animals are already present, with pigs and goats regularly sighted through the bush and farm. A fenced safari-style park stocked with deer or other game species, guided hunting with lodge accommodation, or a private hunting block for the owner and guests are all conceivable at this scale. The existing bush cabin, sleepout and walk-in chiller are a useful base to build from.

Alternative Land Uses

OTHER OPPORTUNITIES

The property also lends itself to eco-tourism or glamping accommodation in the bush margins, retreat or event use around a new homestead site, native retirement and wetland establishment for biodiversity or Transferable Rural Site Subdivision (TRSS) outcomes, and simply a large private landholding with farming retained on the easier country.

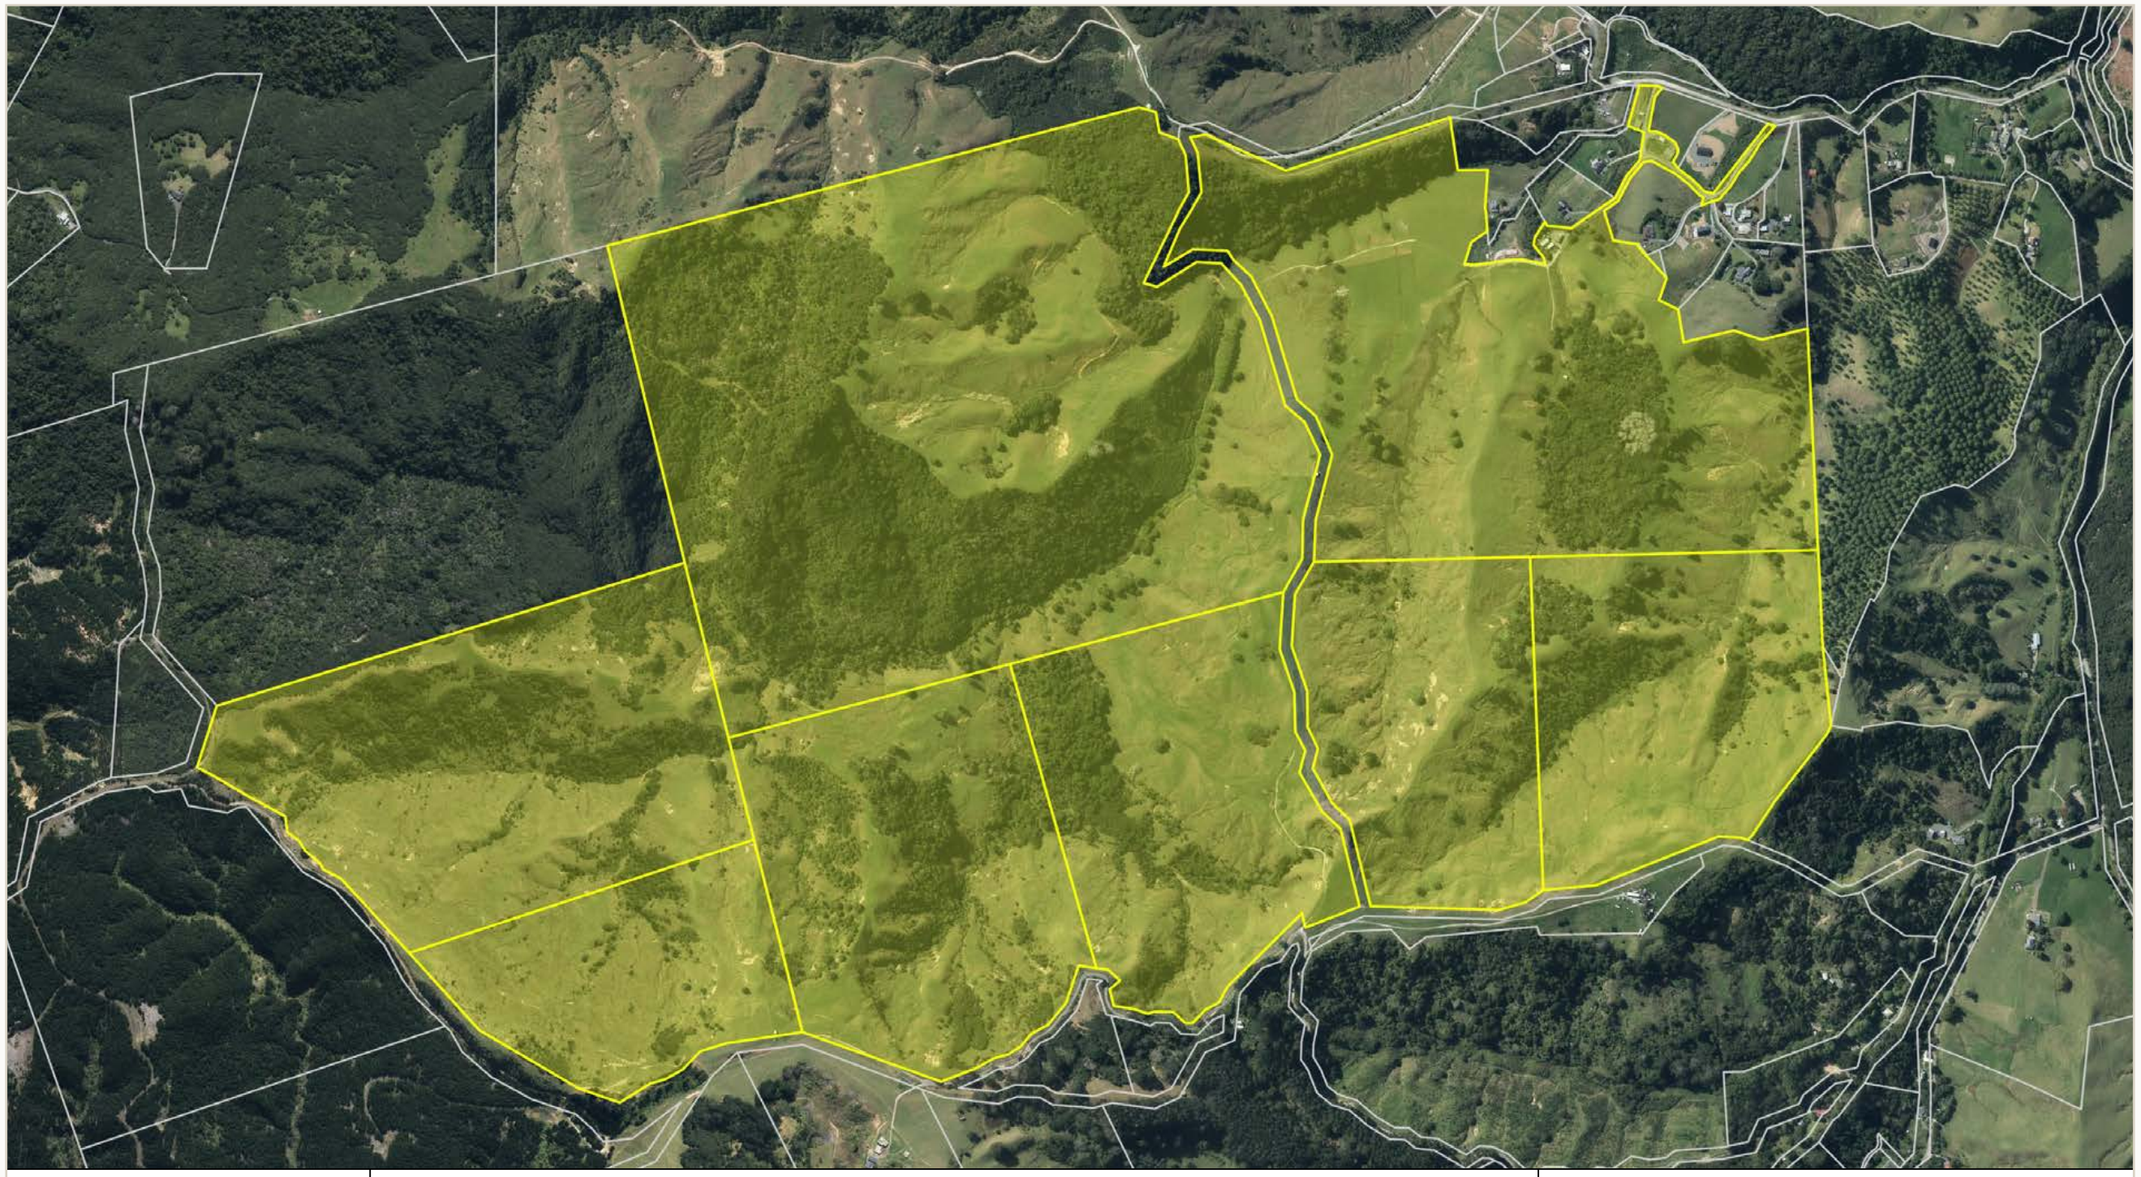

A NOTE ON CONSENTS

The property is zoned under the Auckland Unitary Plan and any commercial tourism, accommodation, game-fencing or visitor activity will require its own assessment under that plan and, in some cases, resource consent may be required. Afforestation is subject to MPI eligibility determination and the National Environmental Standards for Commercial Forestry. Purchasers should satisfy themselves on all planning, consenting and ETS matters as part of their own due diligence.

GRIP

Location

77 Remiger Road sits in the Puhoi valley, one of the most tightly held rural pockets on Auckland's northern fringe. It is a rural setting with genuine seclusion, yet the practical reality is a short and easy drive to a major city.

Key Destinations	DISTANCE
PUHOI VILLAGE	Minutes - including the iconic Puhoi pub
STATE HIGHWAY 1	Direct and easy access north or south - approx. 7 minutes
OREWA BEACH	Approx. 20 minutes
WARKWORTH	Approx. 20 minutes - schooling, services and supplies
AUCKLAND CBD	Approx. 45 minutes
AUCKLAND AIRPORT	Approx. 1 hour

The wider Puhoi and Warkworth district has long combined productive hill country farming with lifestyle and recreation appeal. Completion of the Puhoi to Warkworth motorway has materially improved connectivity north of Auckland, and demand for scale landholdings within an hour of the city continues to be supported by their scarcity.

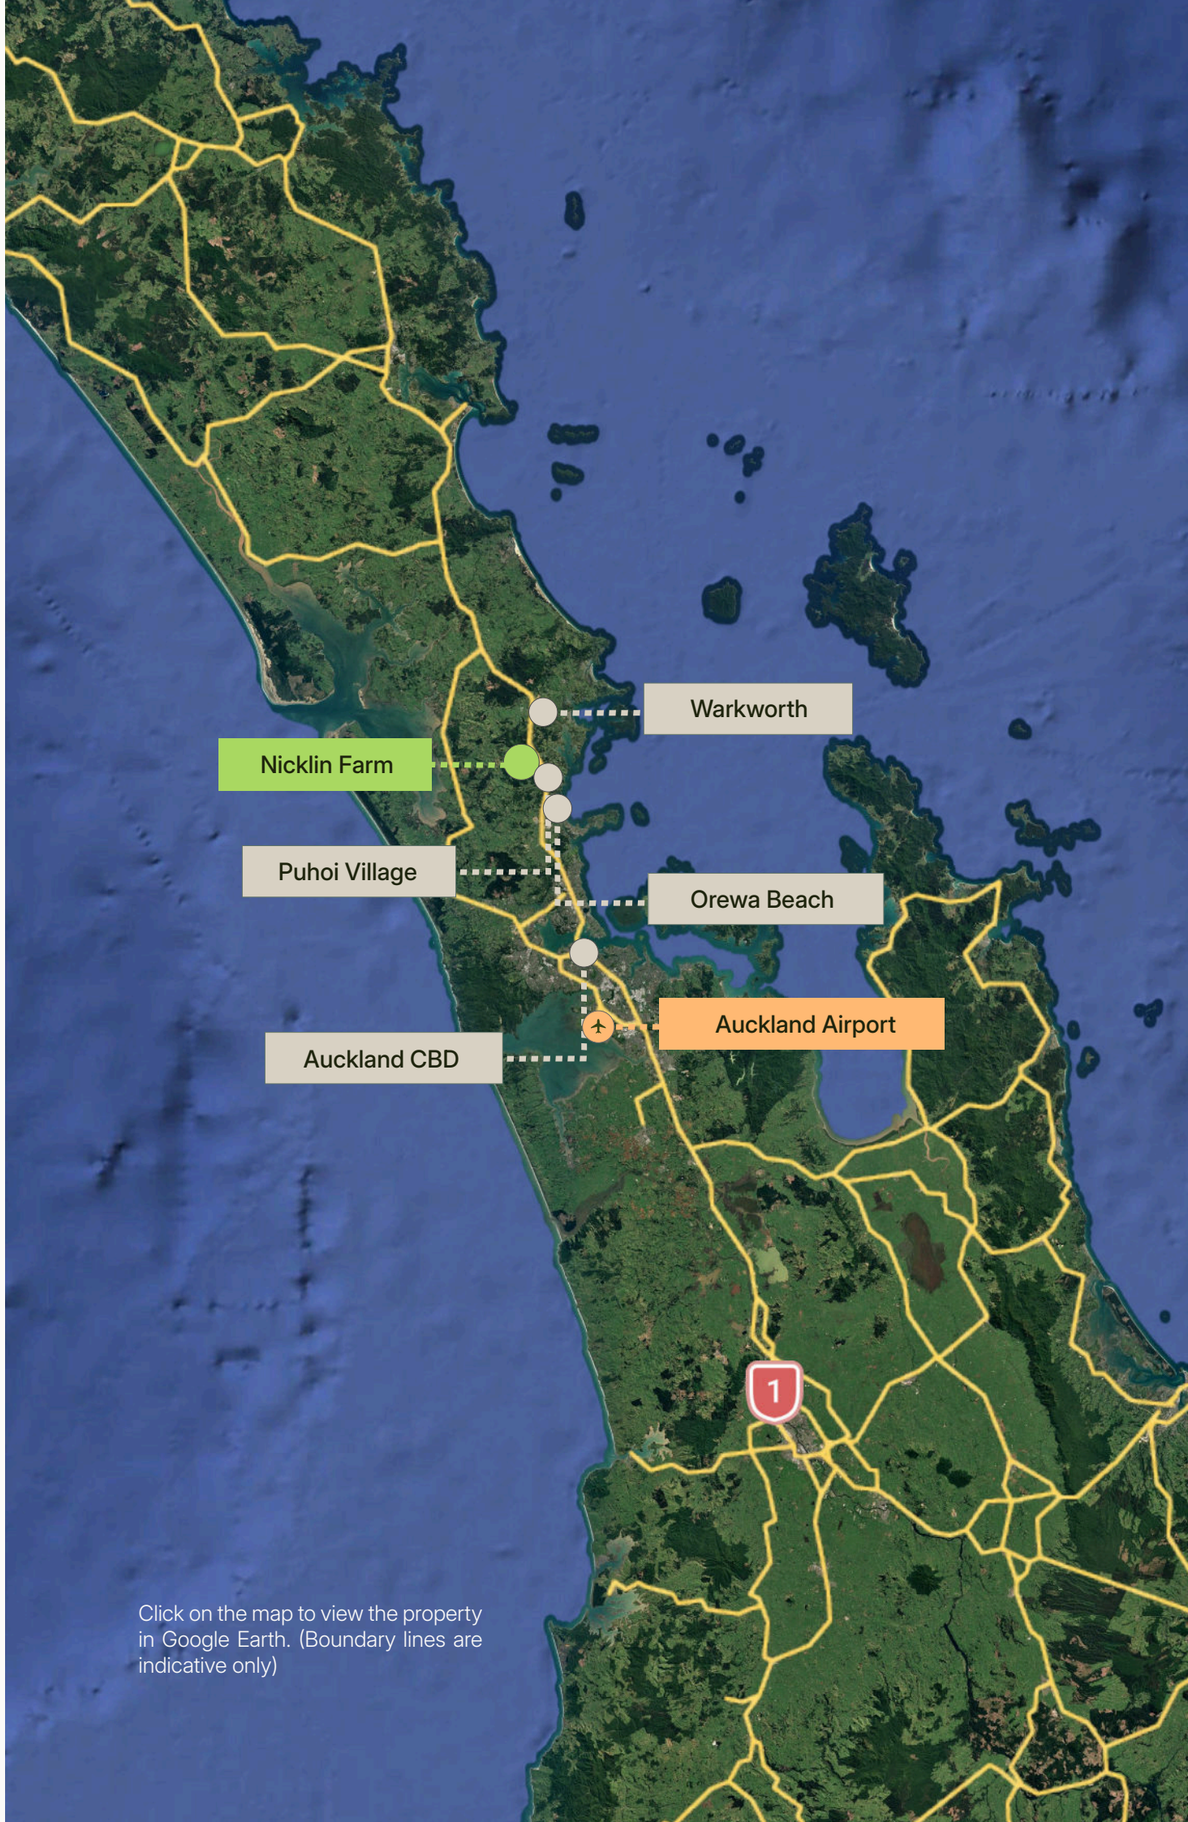

From elevated parts of the property the outlook extends to both coastlines, including Great Barrier Island and the Coromandel to the east.

Climate

Puhoi enjoys a mild coastal Northland-fringe climate with warm summers and reliable rainfall, supporting strong pasture growth. Kikuyu features in the pasture mix and is knocked back by winter frosts. NIWA's Warkworth station, approximately 12 kilometres north, records a mean annual rainfall of 1,454 mm across an average of 214 rain days per year. Rainfall is reliable year-round, ranging from a summer low of around 86 mm in January to a winter peak of around 180 mm in July.

NIWA identifies the Warkworth area as recording materially higher rainfall than urban Auckland and the eastern coastal fringe. For a property being considered for pasture, forestry or carbon, that reliability of moisture is a genuine productivity advantage.

Median annual temperature across most of the Auckland region sits between 14°C and 15°C, decreasing with elevation. Summers are warm and tempered by proximity to both coasts, while winters are cool with some frosts. The predominantly north to north-east aspect across much of the property maximises sun exposure through the main growing months.
